E-CIGERETTE LITHIUM BATTERY RANGE - Bulk Pack

OPTION	NAME	PICTURE	CAPACITY (mAh)	PUFFS (Estimation)	DESCRIPTION	VOLTAGE			SCREW / THREAD:	CHARGING TIME	BATTERY DIMENSION	COLORS AVAILABLE	PACKING	SILKSCREEN LOGO	Logistic information
						Min.	Work.	Max.							
1	eGO Battery		650	750	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. Led light of battery button: there are 3 different led light colors, which indicate the battery power condition. White: 50%-100% Blue: 5%-50% Red: <5%, need to be charged. 3. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	2H	76.5*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body and Bottom	
2	Evod Twist		650	300~750	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. variable voltage function: spin the knob at battery bottom to adjust the voltage from 3.2 to 4.8v. 3. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	2H	91*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body and Bottom	
3	Ego T Passthrough		650	750	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. Led light of battery button: there are 3 different led light colors, which indicate the battery power condition. White: 50%-100% Blue: 5%-50% Red: <5%, need to be charged. 3. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	2H	87*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body	
4	Ego V		650	250~750	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. variable voltage function: variable voltage from 3v to 6v; press the "+" button to add voltage 0.1v per step; press the "-" button to add voltage 0.1v per step; 3. voltage lock function: press "+" and "-" key for 5 seconds to lock/unlock the work voltage 4. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	2H	114*14mm	White, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body	

5	eGO Battery		900	1000	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. Led light of battery button: there are 3 different led light colors, which indicate the battery power condition. White: 50%-100% Blue: 5%-50% Red: <5%, need to be charged.	3V	3.7V	4.2V	M7*0.5	3H	86.5*14mm	White, Purple, Blue, Red, Black, Stainless, Steel	BULK	Logo on the main body and Bottom	10pcs/inner carton (normal brown) ; one color battery for one inner carton ; 60pcs (6 inners)/outer carton (normal brown)
6	eGO Battery		1100	1100	lock/unlock the battery. 2. Led light of battery button: there are 3 different led light colors, which indicate the battery power condition. White: 50%-100% Blue: 5%-50% Red: <5%, need to be charged. 3. Charging time: 4~6 hours. when the led light on the charger is green, it	3V	3.7V	4.2V	M7*0.5	4H	106.5*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body and Bottom	
7	Evod Passthrough		1100	1100	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. Charging time: 3~5 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	4H	116*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body	
8	Evod Twist		1100	700~1100	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. variable voltage function: spin the knob at battery bottom to adjust the voltage from 3.2 to 4.8v. 3. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	4H	116*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body and Bottom	
9	Ego t Passthrough		1100	1100	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. Charging time: 2~4 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	4H	107*14mm	Pink, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body	
10	Mego Twist		1300	900~1300	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. variable voltage function: spin the knob at battery bottom to adjust the voltage from 3.2 to 4.8v. 3. Charging time: 4~6 hours. when the led light on the charger is green, it means full charged.	3V	3.7V	4.2V	M7*0.5	4H	115*18mm	White, Purple, Blue, Red, Black, Stainless, Steel		Logo on the main body and Bottom	
11	go VV3 (VV&VW)		1300	600~1300	1. 5 clicks on/off function: press the battery button 5 times quickly, you can lock/unlock the battery. 2. variable voltage function: variable voltage from 3v to 6v; press the "+" button to add voltage 0.1v per step; press the "-" button to add voltage 0.1v per step; 3. variable watt function: variable watt from 3w to 15w; press the "+" button to add voltage 0.5w per step; press the "-" button to add voltage 0.5w per step; 4. variable watt/variable Switch: pree "+" button for 5 seconds to switch from vv to vw or vw to vv function:	3V	3.7V	4.2V	M7*0.5	4H	135*12mm	Dark Coffee		Logo on the main body
